Full-Stack Developer

📅 2021 - present

📍 Gdańsk, Poland

[Codistry](#) ↗

- Designed and created from scratch using Next.js, a web app with video courses for learning webdev skills (recorded around 100 hours of videos).
- Implemented own [email marketing software](#) ↗ with AWS SES for building email lists and sending newsletters, published it as open source.
- Integrated subscription payments with Stripe along with backend API and webhooks for post purchase automated granting access to videos.
- Covered the project with automated tests (unit, integration, e2e) using GitHub webhooks along with Linux bash scripts to automate CI/CD.

Used technologies: *Next.js/React, TypeScript, Prisma, TailwindCSS, Jest, Playwright, Stripe, Nodemailer, AWS SES, MongoDB, Node.js, Nginx, Linux.*

Software Engineer

📅 2019 - 2021

📍 Gdańsk, Poland

Remote

[Atlassian](#) ↗

- Was part of the Jira Server/Data Center development team, focused on frontend development including automated testing and bug fixing.
- Feature lead of [Default value of system fields](#) ↗, worked closely with backend team, responsible for delivery of highly demanded Jira feature.
- Feature lead of Accessibility settings, worked closely with UX/UI team, delivering UI settings for visually impaired users.
- Took part in recruiting process as code reviewer of home assignments.

Used technologies: *React, TypeScript, React Router, React Testing Library, SCSS, Styled Components, BitBucket, Bamboo, Java, Selenium WebDriver.*

Full-Stack Developer

📅 2014 - 2019

📍 Kielce, Poland

Kuala Lumpur, Malaysia

Kuvi
